

Sales Analysis Dashboard

Project Overview

This project focuses on analyzing sales performance, manufacturer contribution, category-wise revenue, and year-over-year business growth using Power BI.

The objective was to transform raw sales data into actionable business insights by performing data cleaning, data modeling, DAX calculations, and interactive dashboard development.

Data Sources

- Sales Data
- International Sales Data
- Product Dimension
- Manufacturer Dimension
- Geography Dimension
- Date Dimension

Data Preparation

- Imported data from CSV, Excel, and Folder sources.
- Cleaned and transformed data using Power Query.
- Replaced missing category values using Fill Down.
- Split Product and Price columns using delimiters.
- Renamed columns and corrected data types.
- Appended Sales and International Sales datasets.
- Created custom Country Name column to handle missing country values.
- Created ZipCountry key for accurate relationship mapping.

Data Modeling

- Built relationships between Fact and Dimension tables.
- Implemented a Star Schema model.
- Created custom hierarchies for analysis.
- Enabled cross-filtering and drill-down functionality.

DAX Measures

- Previous Year Sales (PY Sales)
- Revenue Growth %
- Revenue Contribution %

Dashboard 1: Manufacturer Analysis

Key Insights:

- Total Revenue: 2.91 Billion
- Revenue increased by approximately 20% compared to the previous year.
- Urban category contributed nearly 80% of total revenue.
- USA generated the highest revenue among all countries.
- Manufacturer performance was analyzed using trend charts and KPI visuals.

Dashboard 2: Sales Analysis

Key Insights:

- Total Units Sold: 8 Million
- Category-wise revenue distribution identified Urban as the dominant category.
- Revenue and growth trends were analyzed over time.
- Manufacturer performance compared across multiple years.
- Revenue versus Growth analysis highlighted high-performing business segments.

Features Used

Power Query, Data Modeling, DAX, KPI Cards, Gauge Charts, Matrix Visuals, Scatter Plot, Play Axis Visual, Conditional Formatting, Dynamic Logo Slicers, Hierarchies & Drill Down, Custom Dashboard Design

Business Impact

The dashboard enables stakeholders to:

- Monitor overall business performance.
- Compare manufacturer contribution.
- Track year-over-year growth.
- Identify high-performing categories.
- Support data-driven business decisions.
